MADE IN BELIZE

In an effort to focus on a better outreach to Belize's private sector, BELTRAIDE made the strategic decision in 2014 to bring back on board a unit designated to meet the needs of Belize's dynamic export sector. This rebirth saw the establishment of EXPORTBelize, a technical unit of BELTRAIDE that provides customized needs-based services in the areas of export promotion and development to foster an enabling environment which promotes diversification and competitiveness of Belize's export sector. EXPORTBelize's vision is to enable a dynamic and competitive export sector that is founded on principles of quality, innovation and customer orientation.

The Core Services of this Technical Unit includes:

1. Ensuring quality and consistency is continuously met by encouraging exporters to benchmark their products and services to international standards;
2. Assisting enterprises in acquiring expertise, know-how, finances and systems necessary to enter export markets;
3. Identifying export opportunities, viable export markets and potential business (buyers, suppliers);
4. Promoting Belizean products and services.

The Made in Belize Catalogue provides an avenue to feature near export ready, export ready and exporting companies, highlighting their product lines and other key information about the company. The Made in Belize Catalogue introduces Belizean products to the world! This publication is in line with EXPORTBelize's export promotion function and it is a valuable tool that we can use to market and promote products of Belize in regional and international markets. We want to create a name for Belize in the global marketplace, focusing on quality, uniqueness and creativity.

The distribution of this catalogue will be far reaching and will be accessible by Diplomatic offices, business support organizations, distributors and other key contacts that can certainly open the doors for new and expanded procurement in Belize.

SME FEATURE AMARABI SEASONING & MARINADE

Wanting to produce something that would make cooking more easy for all persons, whether experienced or in-experienced in the kitchen, she started Amarabi Seasoning & Marinade- condiments free of MSG for all types of meats. These condiments are rich in flavor and easy to apply... so easy that the slogan is, "Just add meat!" Amarabi Seasoning & Marinade is a unique blend of freshly picked herbs and spices that are traditionally found in Belize, the home country of owner, Laura Raymond.

Amarabi Seasoning & Marinades comes in six different flavors: original, rosemary, coconut oil base, chili with coconut oil base, cumin, and curry. These are all sold in supermarkets, butcher shops, and tourist shops around Belize.

Laura worked with the Small Business Development Centre Belize (SBDCBelize) which provides customized needs-based services to micro, small and medium sized enterprises, enabling them to be competitive and grow their businesses. SBDCBelize assisted Laura in designing her label and logo and acquiring machinery; with this support, she was also able to learn about the WEAmericas Accelerator, teaching her the importance of a solid business plan and allowing her to access world-class management education, invaluable networking opportunities and access to finance.

In 2018, BELTRAIDE held its competitiveness month where Laura Raymond was named its first Female Business Ambassador 2018-2019. Laura hopes to assist other aspiring business women to build, grow and market their businesses. Her motto to them, "Being diligent and consistent are the keys to being a successful business woman!"

AGRICULTURE

Agriculture remains an important sector to the national economy. The small-scale farming sub sector produces mainly food for local consumptions and hence significantly contributes to Belize's food security. The new emerging commodities of grains, pulses, livestock, poultry, fruits and aquaculture among others, offer great opportunities for investment and enterprise development for both the national and international export markets.

3R FARMS LIMITED

3R Farm Limited is a mixed farming operation with 720 acres of land with various crops and livestock. The business was launched in 2005 and has facilities in Jenkins Creek in the Southern Stann Creek, Swasey River and Trio in the Northern Toledo District in Belize. Since 2012, 3 R Farm Limited has been emphasizing product diversification and vertical integration as key components of our risk management strategy. We have diversified from a one-dimensional livestock company, to citrus, grain, and cacao production. These operations have been developed over a period of thirteen years and have been fine tuned to a high level of efficiency. The overarching vision has always been driven by product diversification and vertical integration. 3 R Farm Limited's goal is to develop its cacao operation into a consistent supplier of, quality cacao beans to our clients.

While we strive to meet production goals, this must be tempered by the need for environmental consciousness and sustainability. Important to note is that we maintain as much of the native forest as possible, especially the tropical hardwood species found in the area. We therefore seek like-minded trading partners to properly develop this approach to business development.

Address: 100 Sunrise Avenue, Independence, Stann Creek

ASR-BSI

Belize Sugar Industries Limited (BSI) has its roots in the Corozal Sugar Factory (CSF) Ltd., established in 1938. Tate and Lyle PLC, in 1963, acquired the CSF and renamed it Belize Sugar Industries Limited and four years later, in 1967, opened the sugar factory at Tower Hill, Orange Walk. The original Corozal Sugar Factory, located at Libertad Village, was closed in 1985 and production was consolidated at the Tower Hill Sugar Factory. Following the strategic investment in October 2012 by American Sugar Refining, Inc. (ASR), BSI has benefited significantly from investments to improve factory performance and to increase the production capacity for direct consumption sugars. BSI is a sustainable and innovative company committed to growth, continuous improvement, the community, and the environment in which it operates.

L & R Liquors, LTD. was established by Osvaldo Cuello. In April 16, 1996, the first batch of blended Old Master Spirits produced were Extra Dry Gin, Anise & Peppermint Liqueur, Anisette Liqueur, Silver Rum, Coconut Rum, Gold Rum, and Overproof Rum. Fast forwarding to 2019, new products are added to the array of spirits, offered to the Belizean market. Those include: Hyper Premium Vodka, Extra Mature Rum, Na' lu'um Cakao and Banana Liqueurs. L & R Liquors Ltd. is Belize's youngest distillery; even so, it possesses authentic spirit. The distillers take pride in their art and have acquired expertise for three generations. The company encourage responsible consumption of its products.

LIGHT MANUFACTURING

Light Manufacturing refers to manufacturing activity that is less capital intensive and that uses moderate amounts of partially processed materials to produce, fabricate, assemble, or disassemble items that are mostly geared for end users. While still a relatively small sector in Belize and has historically focus on supplying the local market, there has been a gradual expansion of the basket of goods produced by light manufacturers; this basket has expanded to include manufactured goods such as: textiles and apparel, wood products, paper and printing products, chemicals and plastics and non-metallic mineral product.

CARIBBEAN PAPER COMPANY

Caribbean Paper Company commenced in 1997 but not in its own facilities facility. This was until 2011 converting tissue paper, toilet paper, napkins and paper towels. In 2014, Caribbean Paper began using its own raw materials to manufacture its papers using recycled paper and virgin pulp instead of importing raw materials. Its papers are traded in national and international markets under various brands. Caribbean Paper prides itself in quality products and proper hygiene.

Export Market: U.S.

FISHERIES & MARINE

While there has been millions of dollars invested in Belize's Fisheries and Marine industry and many infrastructural and other start-up hurdles crossed, the industry is still bedeviled by the reality of competing on a fierce global landscape. Despite these concerns however, entrepreneurs both local and foreign keep embracing the challenges; for example, the shrimp industry in Belize is in existence for over 39 years.

There are a number of farmed species planted in Belize and these include but not limited to: pacific white shrimp, nile tilapia, cobia, spiny lobster and queen conch. However, investment opportunities lie in the farming of sea weed, sea cucumber, finfish, florida stone crab and their value-added products.

CARIBBEAN SHRIMP LTD.

Caribbean Shrimp Ltd produces and processes premium quality and organically-raised white shrimp on their 260-acre farm in Ladyville, Belize. Located just minutes from the international airport and 30 minutes from the ocean port, their fresh and frozen shrimp can easily be shipped all around the world. Products are available in packages of 5lb boxes (10 individual boxes) in 50lb cases and 1lb retail bags (25 individual bags) in 25 lb cases. Visit their website to learn more www.caribbeanshrimp.net.

Export Markets: Guatemala and Mexico

NORTHERN FISHERMEN COOPERATIVE LIMITED

Northern Fishermen Cooperative Society Ltd. was established 59 years ago in 1960. Thirty-six (36) fishermen from Caye Caulker came together and founded the first fishing cooperative in Belize, under the supervision of the then Cooperatives Registrar, Henry C. Usher. The Cooperative was a pioneer in deep-sea fishing, shrimp trawling and whole fish production, particularly demersals such as: grouper and snapper, stone crabs, live lobsters and almost any marine product that the fishermen could harvest for which there were commercial possibilities. Its greatest assets though are its members whom over the years has been given the means by their own organization, the Cooperative, towards sustainable production which has improved and increased their personal assets, ultimately being beneficial to and for the Cooperative.

Address: 49 North Front Street, PO Box 647, Belize City, Belize

ENERGY

Access to affordable and reliable energy sources is critical to Belize's national development. With the escalating volatility in global oil prices, sustained national development in Belize is contingent on improving our energy independence through the generation and production of domestic and renewable energy such as: biomass, hydro, solar and wind and energy. There are also excellent investment opportunities for efficiency interventions particularly in areas of lighting, cooling, equipment and appliances in the residential and commercial building sectors in Belize.

BELIZE NATURAL ENERGY (BNE)

Belize's premier energy company, Belize Natural Energy (BNE) has led the way in responsible exploration, production and marketing of oil and gas in Belize for the past 19 years. BNE is a fully integrated energy company with its operations spanning from geology and drilling, to LPG blending and oil crude sales. At BNE they understand that each employee is a steward of Belize's cleanliness, as well as its corporate culture and policies establish responsible practices to safeguard the environment of Belize.
